The Company

In 1985 we at Hauler Racks introduced the best alternative to traditional welded steel utility racks. By manufacturing with aluminum, and utilizing our innovative and patented design, we pioneered the first aluminum utility racks on the market. We continue to outperform other utility rack manufacturers by producing strong, durable, light-weight, rust-proof, and great-looking racks that are capable of carrying up to 1200 lbs, yet can be quickly and easily installed and removed from trucks, vans or sport utility vehicles.

At Hauler Racks we pride ourselves on providing a variety of quality equipment carrying solutions. We are committed to listening to our customers, and providing the level of service they expect and deserve.

Hauler II Truck Racks

Hauler truck racks are an excellent solution for the work-person who needs a heavy duty commercial rack that will fit any truck or truck with a camper shell. Crafted from bright dipped anodized aluminum, and equipped with 3 crossbars, this truck rack will not rust and extends to the windshield of the cab. The Hauler II features a unique design that allows the rack to universally fit more vehicles needing only 3 part numbers for full size trucks and 4 part numbers for mini trucks allowing the rack to be easily stocked by dealers.

Features and Benefits

Hauler II Truck Rack

Feature
